

New Fall Goods

NEW PLAIDS
ROMAN STRIPES
PLAIN GOODS

Sometimes the men make derogatory remarks concerning the clothes Dame Fashion decrees the ladies should wear, and sometimes, if they pay the bills, they have a right to protest.

However, the new Fall Goods we will display next week will leave no room for even the most chronic fault finder to object to.

The new Plaids, Roman Stripes and Plain Goods to be used this fall by the up-to-date dresser are too pretty to leave any room for cranky men to display their rancor.

Our first shipment contains the very choicest of the New Goods, and will be the first to be offered to the ladies of this community.

EXPLAINS CAUSE OF DYING CATTLE

(Continued from page 1)

to use the remedy recommended for fear of similar losses. For this reason, and also to correct the reports current regarding the matter, an explanation is made.

"In this particular field on the Culbertson place was the worst of the grasshopper infestation and accordingly all of the preliminary work in checking them was done there. When all mechanical means of catching the grasshoppers failed, the poison was tried and in this field the poison was placed. All of the references on poisoning hoppers recommend the placing of the poison mixture in drills or piles in front of the hopper advance and this was the first method tried. This did not prove effective and later the thin broadcasting method was tried. With this method there is no likelihood of stock, even if in the field, getting enough of the poison to hurt them, but even then the recommendation was to keep them out until after a heavy rain. In this field where the application was in bulk the poison was dangerous and under no consideration should cattle have been placed in such a field until after a very heavy rain.

"A statement has been made that I was forbidden to place poison in this field. I was told to go ahead and find the effective way to combat the grasshoppers. Any such prohibition did not reach me. I understood that everyone knew of the presence of the poison in the field, as I made a report to a general meeting held in Fort Klamath of the results of the trials and the success of the poison method, and it was general knowledge that this field was the only one where any work had been done. Warning was also given as to turning stock into fields or pastures before rains.

"The whole affair is the result of an unfortunate misunderstanding. If the printed directions are followed and the preparation scattered accordingly, it is very doubtful if any bad results would follow even with cattle in the same field, but to be on the safe side all stock should be removed until after a heavy soaking rain. This, of course, applies with double force where scattered in bulk.

County Agriculturist."

PARK SUNDAY

MONTAGUE POSTPONES GAME, SO
MANAGER PERRY DeLAP SEC-
URES BONANZA TEAM TO FILL
IN DATE

Klamath Falls vs. Bonanza, Modoc
Park Sunday 2:30 p. m.

The Klamath Falls baseball aggregation, strengthened by the addition of the best twirler in the Western Tri-State League, Schroedner, will be seen in action Sunday against a strong team from Bonanza.

Contrary to expectations and arrangements made by the management of the local team, the game with Montague was postponed by that team. Montague was desirous of meeting the local fans and tomorrow was the date set. Word from Montague yesterday, however, spoiled all the "picnic fix-in's" and so other arrangements had to be made.

The home players and sports are not at all pleased with Montague's action. The team here has been reorganized and a strong team built up. Many teams have expressed a desire to clash with them and every effort is to be made to play the games scheduled and give the followers of the national sport good exhibitions. With the addition of Schroedner to the pitching staff, it is believed that Klamath will be able to more than hold her own with any of them. Weed has expressed a desire for revenge and arrangements are being made to give them all the chance in the world. It is probable that that chance will come on August 16th. The local team will journey to that city on that date.

Tomorrow Schroedner will play his first game with the locals. Motale will be on the receiving end and with such a battery the fans have a perfect right to expect some high class ball.

Following the disappointment of Montague and the failure of the team which was to play last Sunday to put in an appearance at the proper time, the local management is contemplating having a specified sum put up whenever a game is scheduled to insure the appearance of the other team on that date. This will insure the games when they have been arranged for.
